

JRA's Healthcare Facility Solutions

If you are developing a healthcare project and seek more info on costs and implementation, please call Steve Wiser at 800-772-1581 ext. 17 or email him at Wiser@JRArchitects.com

Visit our website at www.JRArchitects.com/healthcare.html

JRA can provide a broad range of healthcare facility solutions. Provided below are several of these methods:

'Total Design Solutions': From initial budgeting to final occupancy, JRA can manage every aspect of a design and construction project. We can define the scope, meet with code officials, implement the contract documents, and administer the construction.

Expediter 'Solutions ID': JRA can define the project scope upfront, then navigate the various implementation logistics for you. Whether Design-Build, Traditional, CM at Risk, etc., we can streamline this somewhat frustrating process and get the project delivered in a timely, cost-effective manner.

Team Solutions: If you already have the scope defined and need the logistics to implement it, then JRA can provide the know-how to facilitate the development.

Assessment ID: JRA has staff who can perform healthcare facility assessments.

Rated Label ID: Frustrated of fire-rated walls being constantly damaged? Then, JRA can designate your rated walls and doors that can save you time and money.

Trouble Shooter ID: If you'd like a second opinion on your planned project, then JRA can review your design and offer constructive analysis.

JCAHO Statement of Conditions: JRA staff have performed dozens of SOC's across the country and can provide you a reasonable, prompt survey.

These are just a few of the healthcare facility solutions that JRA can assist you with. For more information and details, contact Steve Wiser at 800-772-1582 ext. 17 or email him at Wiser@JRArchitects.com
