

Rated Label ID

Maintaining the Life Safety Integrity of Your Healthcare Facility

Tired of This?

Then, do This!

Use JRA's "Rated Label ID" process to notify Staff and Contractors of Life Safety Construction

Frustrated by holes continually being punctured in your healthcare facility's fire and smoke walls?

Then, use JRA's "Rated Label ID" program.

"Rated Label ID" will label your fire / smoke walls and doors.

These labels will notify staff and contractors immediately of these important life-safety construction components.

No longer will staff or contractors be able to use the excuse 'I didn't know this wall was rated.' You will be able to better control and avoid damage to your rated walls and doors.

And, this will save you much time and dollars in future repairs and JCAHO / Life Safety inspections.

Why JRA? JRA has staff who perform Life Safety surveys throughout the country and are knowledgeable of NFPA 101 for healthcare facilities. We can quickly and reasonably perform this service.

For more information, contact Steve Wiser, JRA's Director of Healthcare Design, at 502 523 6799 or via email at Wiser@JRArchitects.com

He can provide you a quote and other details on this valuable service.

Keep Your Facility's Life Safety Construction In Good Condition. Contact JRA today to learn more about our "Rated Label ID" service.
